

SENIOR ARCHITECTURAL SYSTEMS

Dear Sirs,

Re: CE Marking

As part of our ongoing commitment to supporting our customers, we are writing to you in order to authorise you as a fabricator of our products.

This will allow you access to our fabrication details, our Initial Type Testing data (ITT) and also our profile thermal performance calculations.

You will be aware that, in order to issue CE Marks, you must fabricate in accordance with the details set out in our manuals. This letter should be kept on record as evidence of your authorisation.

Our Initial Type Testing data will also be available to you and will give you certain required information on Air Permeability, Water Ingress and Gusting. This information will appear on both your Declaration of Performance (DoP) and the actual CE Mark/Certificate.

Please note that in order to utilise this test data you must be manufacturing the product with SAS components. This applies to pressure plates on curtain walling, ALL gaskets and all other accessories.

If you purchase these items elsewhere, our initial type testing will not be applicable and you will not be able to provide the required CE Marking.

Hardware items, such as hinges, locking mechanisms etc. may be purchased independently but you should ensure that you provide the same product as set out in the test data in order to claim compliance with the test report.

CE Marking goes live on July 1st 2013, and you should already have been sent the document entitled “CPR GUIDELINES FOR ALUMINIUM DOORS, WINDOWS AND CURTAIN WALLS” along with the SAS and CAB guidance notes.

Should you require further clarification, please do not hesitate to contact Senior Architectural Systems.

Please sign and date the area below to confirm receipt and acceptance on this agreement.
